

As a Grants to Green Champion, how are we becoming more environmentally sustainable?

- 🍃 **We use Wi-Fi enabled thermostats for all heating and A/C units which are controlled through a web interface.**
- 🍃 **All fluorescent fixtures have been replaced with LED fixtures.**
- 🍃 **All interior lighting is controlled by occupancy, vacancy, and photo sensors.**
- 🍃 **All new heating and A/C units are high efficiency air conditioners and heat pumps.**
- 🍃 **Six exterior flood lamps have been replaced with LED fixtures.**
- 🍃 **We have dual-level motion sensing LED fixtures in all stairwells.**
- 🍃 **Our newly renovated bathrooms have low-flow water fixtures and tankless point-of-use water heaters.**
- 🍃 **The new roof over our cafeteria building has R20 roof insulation.**

We're excited to continue to take steps to be more environmentally sustainable to benefit the communities we serve!

connect. strengthen. sustain.
